

ievo[®] Ultimate[™] Reader

PAC introduce ievo[®] into our access control portfolio for internal or external use.

ievo[®] has been designed, after many years of research, by a team of professionals who have been at the sharp end of biometric deployment, installation and integration. This wealth of knowledge has been obtained not only from industry experiences with the shortfalls of existing technologies, but also obtaining feedback from installers and end users.

Biometrics have proven time and time again to overcome all of the security issues that card and fob systems have. The cost of biometric systems, however, coupled with reliability issues have curtailed profits and industry growth. ievo[®] eradicates all of these existing issues and offers a quick, simple and cost effective solution.

ievo Ultimate[™] has been integrated with PAC SecureNet to provide a method of enrolling finger templates into the access database. ievo[®] offers PAC the opportunity to provide a reliable and superior biometric product to all of its new and existing clients.

ievo[®] uses multispectral imaging combined with a superior award winning algorithm that together bring many unique features offering a large number of outcomes and benefits.

FEATURES:

- Identification < 1 second
- Multispectral imaging sensor
- Thermostat heated sensor for external use
- Spoof detection
- Vandal resistant
- User friendly
- LED accepted/denied indication built into button
- Audio beep indication
- Internal and external use
- Harsh environments
- PAC output
- 1:N matching up to 8,000 users
- Integrates into existing SecureNet systems*

to find out how you can start benefiting from a tailored PAC security system that accommodates your business'

"We have used PAC for many years on a variety of different projects. These have ranged from large scale, city-wide access control for councils, to high-security and high-profile buildings. Not forgetting smaller installations such as schools and offices. The product range can cater for all the different needs. We value PAC highly, it ticks all the boxes, is great to use and the customer/technical services are superb."
