

iLOFT MONITOR CRYSTAL FRAME

Reference: 5631

The prestigious designers' association ADI-FAD awarded the iLOFT the "Delta Selection 2007" seal of approval, acknowledging its innovative value, conceptual renovation, formal elaboration and manufacturing quality.

DESCRIPTION

The prestigious designers' association ADI-FAD awarded the iLOFT the "Delta Selection 2007" seal of approval, acknowledging its innovative value, conceptual renovation, formal elaboration and manufacturing quality. This monitor will mean an important growth in top of the range home projects.

New materials. Lightweight. Transparent. Subtle.

Pure lines. A silhouette suspended on the wall, faintly outlined: iLoft, the most innovative FERMAX video door entry system. Fermax's proposal for the new digital home, a monitor that fits in with today's surroundings. iLoft achieves the perfect balance between the functional needs for security and communication between the home and the access to the building, and elegance and integration with the new indoor architecture.

Manufactured with new materials where the polycarbonate transparent glass covering the whole surface stands out, iLoft is a video door entry with a 3.5" colour screen that is totally embedded in the wall.

Compact. Extra-flat line equipment, where the quality and care of the materials and the simplicity of lines are united to provide an architectural, minimalist and subtle design.

In iLoft we have looked after all the elements, every detail: metallic painted pushbuttons, transparent polycarbonate glass casing covering the whole surface.

Colour video door entry system including 3.5" TFT screen and hands-free operation.

TECHNICAL SPECIFICATIONS

Flush Monitor dimensions: 131 (width) x 197 (height) x 60 (depth) mm
Emerges 14 mm from wall once embedded

FERMAX flush-fit box dimensions: 108 (width) x 158 (height) x 45 (depth) mm
Standard flush-fit box dimensions (10x10x5 cm): 114 (width) x 174 (height) x 50 (depth) mm.

Surface Monitor dimensions: 131 (width) x 197 (height) x 34,3 (depth) mm

Weight: 0,515 kg

Size of product when packed: 28,5x21,5x3,5 cm
