

PALACE BUS 3 TELEPHONE

Reference: 8084

In addition to standard door entry functions, Citymax PALACE simplified telephones enable internal communication (all with all) between 12 points or extensions in the same office, company or home.

...

DESCRIPTION

In addition to standard door entry functions, Citymax PALACE simplified telephones enable internal communication (all with all) between 12 points or extensions in the same office, company or home.

Outdoor and indoor call tones are different so you can distinguish the source.

Terminals have 6 pushbuttons below the phone handset and an additional one on the base to make the call to each extension.

Fermax extra-flat format phones are made in high impact ABS plastic with mirror polish type finish for easy cleaning.

Applied industrial design and top quality components come together in a robust and reliable phone that will please both professional and user alike.

Easy fit wall mounted installation.

Depending on the look (number of buttons featured), Citymax phones in this simplified BUS3 model can be:

- Basic:
 - Door release button
- Extra:
 - Door release button
 - 2 additional function buttons

There are 2 BUS3 telephone models:

- Palace Basic BUS3 telephone (REF 8084)
- Palace Extra BUS3 telephone (REF 8086)

TECHNICAL SPECIFICATIONS

In-house installation (entry system + internal communication) is reduced to a single 3-wire BUS.

Installations with interior communication will use Ref. 8084 and 8086 telephones with Ref. 88039 switcher.

Installations with both internal and outdoor communication (conventional outdoor panel system) will use Ref. 8084 and 8086 phones with switcher Ref. 9017.
