DESCRIPTION

Necessary when the panel must be fitted in a point hard to access, for example behind a gate.

It is also useful to focus the camera better, in places where the panel is installed so that the person who calling is outside its field of vision.

They are manufactured in 2mm thick anodized aluminium.

As it is possible to combine two or more panels, as long as they are from the same series, there are 9 series de angular complements for single, double or triple panels, choosing the angular complement from the series necessary in each case.

Corner Complement Versions for 1, 2 or 3 panels:

- SINGLE: 1 Panel.
- DOUBLE: 2 Panels.
- TRIPLE: 3 Panels.

Necessary when the panel must be fitted in a point hard to access that makes optimal communication/vision difficult, for example, behind a gate.

The angular complement corresponding to the series of the panel/s installed must be selected. Models (available depending on panel type): simple (for 1 panel); double (for 2 panels); triple (for 3 panels).

TECHNICAL SPECIFICATIONS

Serves for SERIES:

S5-SIMPLE

Dimensions: 135x250 mm (width-height)

Series 5 Panel.

- Panel measurements: 130x246 mm (width-height):
- Flush-fit box dimensions:: 115x233x45 mm (height-width-depth).
