

CL3622B

Wireless Door Intercom DEC Telephone and Doorbell System

Summary:

This wireless dual function door intercom system allows you to have a 2 way conversation with the visitor at your door before allowing entry, using the DECT telephone handset. With no wiring required between the outdoor station (intercom/doorbell) and the DECT telephone handset, this DECT telephone intercom system is quick and easy to install. The CL3622B is suitable for both residential and commercial use and has an operating range of up to 300 metres from the DECT telephone handset to the door intercom outdoor station
