1986-2011

Technology for the future

All Audio and Video kits connections indicated in this catalogue are for one or two way standard installations.
For special installations please contact our technical staff by e-mail at the following address technical@videx.it

The Widest range of audio and video kits

Our ever expanding range of audio and video kits is due to our policy of continued product improvement and new product development. Two new additions have been introduced to our video intercom range:

- 3600 Compact colour video intercom
- 5000 Eclipse Slim Line colour video intercom

The 3600 Compact series is based on and is similar in appearance to the popular 3000 series video monitors but will only be available in a colour version. We can confirm that mono (CRT) monitors are slowly being phased out and replaced with industry standard 3.5" high quality active matrix LCD monitors, which, in time will become the standard for all Videx Video Kits and Video Monitors.

The 3600 is currently available in the following models: Art.3688 for use on the Videx two wire colour video kits (as CESVK range).

Art.3656 for use on the Videx six wire colour video kit range (CVK4K..., CVK8K... and CVR4KV range).

The 5000 Eclipse Slim Line range of colour video monitors offer the same functions as the standard 5000 range but have been re modelled in the new "Slim design" where the units depth has been substantially reduced by 19mm (from 53mm to 34mm). The new range of "Slim Line" intercoms incorporate built in termination connectors and the wall fixing plate which are all located in the lower part of the unit. The 5000 "Slim Line" range has an optional flush mounting kit available. As a result of this re modelling the "Slim Line" range does not allow for an optional telephone handset to be fitted.

Products that have recently been introduced include the 8000 series audio and video kits, the two wire 4000 series video kits, the 4000 vandal resistant series audio and video kits, and the market leading 4000 series audio GSM kits (using quad band GSM mobile technology), now with additional features added.

Videx audio and video kits are not only identified by their modern design, but most now incorporate the latest microprocessor technology and voice switching techniques. This technology has also been incorporated in the manufacture of the 4000 and 8000 range of door panels and the latest range of audio and video intercoms.

All Videx 4000 and 8000 series video kits now offer an extended range of functions which include, intercommunication facility (between video intercoms in the same apartment or among those in a different apartment), timed privacy with LED indication, door monitoring, visual and audio indications to confirm system operation, inputs for "push to exit" service, option for multiple entrance (up to 4 doors) and the use of a six wire common bus for both 1 and 2 way systems.

All kits in the 4000 and 8000 range are also available with an integral codelock (allowing users to open the door by entering their access code). A proximity key reader option is also available for the 4000 range (where the user can open the door by presenting their proximity fob/card to the reader).

All video kits are currently available in colour or b/w (b/w will be phased out over time), 1 or 2 way, flush or surface mounted (determined by the door panel type) and all versions are available in the various finishes which can be found at the back of this brochure.

A memory video phone option is available for many of the video kits. This allows a record of the visitor to be captured (b/w or colour) with a date and time stamp. The visitors record can be captured manually by pressing the relevant button on the video intercom or set to capture automatically when a visitor calls. The memory phone option can be ordered by adding /MV to the basic code of the video kit.

All audio kits using the standard modular systems (4000 or 8000 range) can upon request be expanded up to 12 call push buttons.

2 WIRE BUS VIDEOKIT CESVK SERIES

The CESVK video kits require only 2 wires to carry video, audio and data. Developed from the VX2300 2 Wire digital video door entry system, the video kit uses the same devices (intercoms, videophones, videomonitors, distributors, exchangers, power supplies etc.) and offers the following facilities:
• Facility to make multiple entrance systems using the exchanger Art.2301N;
• Facility to make systems with up to 7 users (requires Art.4333 firmware revision 2.0 or later);
• Facility to connect up to 4 intercoms/videophones in parallel using the distributor Art.317 (if videophones must be switched on at the same time, the additional videophones must be powered separately);
• Intercommunication between intercoms/videophones inside the same apartment or between intercoms/videophones inside different apartments (two way videokit);
• The use of the Art.2305 BUS relay for additional services;
• Disability Friendly - Acoustic & Visual signalling of the system status (busy, call in progress, conversation in progress and door open signalling);
• Recall (selective entrance recall on systems with 2 or more outdoor stations);
• Local call tone which is different from the external push button call tone;
• Videophone incorporates "Privacy" On/Off facility (with either latched or timed activation of privacy);
• Programmable Call, conversation and door opening times;
• Dry relay contacts for electric lock.

CESVK-1
One button videokit comprising of:
1 Outdoor station including speaker unit module Art.4333-1/Colour comprising of high quality auto iris camera with white light illumination LEDs plus one module flush mounting box with module support and hinge Art.4851. Standard finish: mirror stainless steel for the front plate and gun metal grey for the module support.
1 Art.3688 3600 Series Videophone with 3.5" colour TFT flat monitor, "door open/intercommunicating call", "camera recall" and "Privacy on/ Call reject/Service" push button plus "on" and "door open" LEDs* and one "privacy on" LED. Electronic call tone with 3 level adjustable volume. Controls: picture hue and brightness. Complete with wall mount support Art.5980.
1 Art.2321 Specific power supply in a Type A 9 module DIN box.
Packing: Cardboard 29x45x13 cm total weight 3,8 Kg.

CESVK-2
As CESVK-1 but two call button version speaker unit Art.4333-1D/Color and 2 videophones Art.3688.
Packing: Cardboard 26x29x25cm total weight 4,15Kg.

CESVK-1S, CESVK-2S
As the flush mount versions but with surface mounting box Art.4881.
Packing: the same as equivalent flush model with total weight of 4,1 Kg for one button version and 4,45 Kg for two button version.
The module support frame and the module front plate are available in other finishes, **see pictures 5 and 6 on page 29** for available versions and additional suffix to use for orders.

The above colour kits can be ordered with a different videophone model , **see page 30** to check their features, code, photos and dimensions.

*Some LED's require additional connections in order to work.

2 WIRE BUS VIDEOKIT CESVK/ECLIPSE

The CESVK/ECLIPSE kits require only 2 wires to carry video, audio and data. Developed from the VX2300 2 Wire digital video door entry system, the video kit uses the same devices (intercoms, videophones, videomonitors, distributors, exchangers, power supplies etc.) and offers the following facilities:
• Facility to make multiple entrance systems using the exchanger Art.2301N;
• Facility to make systems with up to 7 users (requires Art.4333 firmware revision 2.0 or later);
• Facility to connect up to 4 intercoms/videophones in parallel using the distributor Art.317 (if videophones must be switched on at the same time, the additional videophones must be powered separately);
• Intercommunication between intercoms/videophones inside the same apartment or between intercoms/videophones inside different apartments (two way videokit);
• The use of the Art.2305 BUS relay for additional services;
• Disability Friendly - Acoustic & Visual signalling of the system status (busy, call in progress, conversation in progress and door open signalling);
• Recall (selective entrance recall on systems with 2 or more outdoor stations);
• Local call tone which is different from the external push button call tone;
• Videophone incorporates "Privacy" On/Off facility (with either latched or timed activation of privacy);
• Programmable Call, conversation and door opening times;
• Dry relay contacts for electric lock.

CESVK-1/ECLIPSE

One button videokit comprising of:
1 Outdoor station including speaker module Art.4333-1/Colour comprising of high quality auto iris colour CCD camera with white light illumination LEDs plus one module flush mounting box with module support and hinge Art.4851. Standard finish: mirror stainless steel for the front plate and gun metal grey for the module support.
1 Art.ECLIPSE Intelligent Hands free video monitor using 3,5" full colour active matrix LCD monitor, with "door open/intercommunicating call", "answer/camera recall", "privacy on/off ", "bus relay activation" buttons all with LED* indication and 2 additional service buttons. Controls: loudspeaker volume, call tone volume, brightness and hue. Programmable number of rings, privacy duration and intercommunication mode. Electronic call tone plus active low inputs for local bell and alarm.
1 Art.2321 Specific power supply in a Type A 9 module DIN box.
Packing: Cardboard 29x45x13 cm total weight 4,3 Kg.

CESVK-2/ECLIPSE

As CESVK-1/ECLIPSE but two call button version speaker unit 4333-1D/Colour and 2 videophones Art.SL5488.
Packing: Cardboard 26x29x25cm total weight 5,15Kg for B&W and 4,35Kg for color.

CESVK-1S/ECLIPSE, CESVK-2S/ECLIPSE

As the flush mount versions but with surface mounting box Art.4881.
Packing: the same as equivalent flush model with total weight of 4,6 Kg for one button version and 5,45 Kg for two button version.

The module support frame, the module front plate and the videophone are available in other finishes, **see pictures 5, 6 and 7 on page 29** for available versions and additional suffix to use for orders.

*Some LED's require additional connections in order to work.

CVR4KV SERIES VIDEOKIT

The CVR4KV is a new range of vandal resistant videokits. Developed from the popular VK4K videokit, the VR4KV offers a number of operating features and allows greater flexibility for installation. The face plate is manufactured from 2.5 mm stainless steel.
• Up to 4 outdoor stations (video or audio only) with 2 call push buttons calling 2 independent apartments;
• Up to 3 peripheral devices connected in parallel to each videophone (additional videophone, extension sounder, telephone handset etc.);
• Disable Friendly - Acoustic & Visual signalling of the system status (conversation in progress, busy and door open signalling);
• Recall (selective entrance recall on systems with 2 or more outdoor stations);
• Intercommunication between internal videophones;
• Local call tone which is different from the external push button call tone;
• Videophone incorporates "Privacy" On/Off facility (with either latched or timed activation of privacy);
• Programmable Call, conversation and door opening times;
• Dry relay contacts for electric lock;
• Power supply can be connected to the videophone or the outdoor station.

CVR4KV-1

One button videokit comprising of:
1 Outdoor station including speaker unit module Art.VR4KAMK-1 and camera module Art.VR4KCMC comprising of high quality auto iris lens CCD colour camera and white light illumination LEDs plus two module flush mounting box with module support and hinge Art.4852. Standard finish: brushed stainless steel for the front plate and gun metal grey for the module support.
1 Art.3656 3600 Series Videophone with 3.5" colour TFT flat monitor, "door open/intercommunicating call", "camera recall" and "Privacy on/ Call reject/Service" push button plus "on" and "door open" LEDs* and one "privacy on" LED. Electronic call tone with 3 level adjustable volume. Controls: picture hue and brightness. Complete with wall mount support Art.5980.
1 Art.850K Power transformer in a Type A 5 module DIN box.
Packing: Cardboard 12x45x43 cm total weight 5.4 Kg

CVR4KV-2

As CVR4KV-1 but two call button version speaker unit Art.VR4KAMK-2, 2 videophones Art.3656, 2 power transformers Art.850K and one video distributor Art.316N.
Packing: Cardboard 26x29x25 cm total weight 7.1 Kg.
CVR4KV-S, CVR4KV-2S

As the flush mount versions but with surface mounting box (Art.4882).
Packing: the same as relevant flush model with total weight 5.7 Kg for one button version and 7.4 Kg for two button version.
The module support frame is available in other finishes, **see pictures 6 on page 29** for available versions and additional suffix to use for orders.

The above colour kits can be ordered with a different videophone model , **see page 30** to check their features, code, photos and dimensions.

4K SERIES AUDIOKIT

The 4000 Series audio door entry kits benefit from advanced features such as electronic call tone generation and lock release relay included within the door panel. This reduces the cable requirements between the handset(s) and the door panel to only 4 ("3+1") connections. For this reason larger cable distances using small cores sizes can be achieved between door panel and telephones.

4K-1

One button door entry kit comprised of:
1 Outdoor station *including a one call button speaker unit Art.4836-1 and a flush mounting box with module support and hinge Art.4851.*
Standard finishes: mirror stainless steel for the front plate and gun metal grey for the module support.

1 Art.3011 *3000 Series Smart Line wall mount telephone with "door open" push button and electronic call tone with 3 level adjustable volume control.*

1 Art.321 *Power Supply in a type A 3 module DIN box.*
Packing: box 30.5x29x7cm total weight 2 Kg.

4K-2

As 4K-1 but two button version with 2 intercoms and 2 call push button speaker unit Art.4836-2.
*Packing: box 41x39x7cm total weight 2.3 Kg.*

4K-1S, 4K-2S

As door entry kits above but with surface mounting box Art.4881.
Packing: the same as the flush versions but with a total weight of 2.3 Kg for one button version and 2.6 Kg for two button version.

*The module support frame and the module front plate are available in other finishes, **see pictures 5 and 6 on page 29** for available versions and additional suffix to use for orders.*

VR4K-1S

VR4K SERIES VANDAL RESISTANT AUDIO KIT

VR4K is a new range of vandal resistant audio kits, developed from the popular 4K series.
The face plate is manufactured from 2.5 mm stainless steel and incorporates IP68 stainless steel push buttons.
The face plate is housed in the 4000 series front support frame, which gives the unit substantial strength.
Disability Friendly, with acoustic and visual signalling of the system status (conversation in progress, busy and door open indication)
Reassurance tones are standard.
Multiple entrances without the need of the 2 entrance exchange unit.
Dry contact relay for lock release connection.

VR4K-1
One button flush door entry kit comprising of:

*1 **Outdoor station** including one call button speaker unit module Art.VR4KAM-1 and a flush mounting box with module support and hinge Art.4851. Standard finish: brushed stainless steel for the front plate and gun metal grey for the module support.*

*1 **Art.3111** 3000 Series wall mount telephone with "door open" and "service" push buttons and electronic call tone with 3 level adjustable volume control.*

*1 **Art.520M** Power Supply in a type A 8 module DIN box.*

Packing: Cardboard 24x26x7 cm total weight 2.1 Kg.

VR4K-2
*As VR4K-1 but two call button version with 2 telephones and a 2 call button speaker unit Art.VR4KAM-2.*
Packing: Cardboard 31x28x7 cm total weight 2.45 Kg.
VR4K-1S, VR4K-2S
As door entry kits above but with surface mounting box Art.4881.
Packing: the same as the flush versions but with a total weight of 2.4 Kg for one button version and 2.8 Kg for two button version.
*The module support frames are available in other finishes, **see picture 6 on page 29** for available versions and additional suffix to use for ordering.*

GSM INTERCOM KIT

VIDEX

4K/GSM SERIES AUDIOKIT

This range, of the 4000 series have been designed to operate using mobile phone technology with minimal installation time required. The system operates as follows:
• *The visitor presses a button on the door panel to initiate a call.*
• *The door panel then dials the telephone number stored using the GSM network.*
• *If the call is answered, speech and services will be available such as door/gate release.*
The Kit enables a call to be made from an entry point (door, gate, remote site or help point) to any telephone number (mobile or land line). The door panel is available with 1 or 2 call buttons (Expandable up to 50) each able to call two (up to five on system with up to 10 call buttons) pre programmed telephone numbers if the number is busy or not answered, the call will divert to the next). Programming of telephone numbers and additional features is carried out via text messaging or PC software. Additional access control features are also available, allowing a number of callers to open the gate/door simply by dialling the telephone number of the intercom panel (the intercom will not answer these calls but will activate the relay output at no charge to the caller). A SIM card is required for this product (NOT SUPPLIED). It is recommended to choose the SIM card which has best coverage for the area in which the intercom panel will be installed. Both contract and "Pay as you go" SIM cards can be used, if using "Pay as you go" we would recommend setting up an automatic top up to avoid loosing the use of the intercom panel through running short of credit. Features of the system include a dry contact relay output, open collector auxiliary output, push to exit input and switched 0V auxiliary input.

4K-1/GSM

1 Outdoor station *including a one call button gsm speaker unit Art.4810N-1 and a flush mounting box with module support and hinge Art.4851. Standard finishes: mirror stainless steel for the front plate and gun metal grey for the module support.*

Colour hands free video monitor with 3,5" LCD TFT monitor,
"door open/intercommunication", "answer/camera recall",
"privacy on/off" push buttons , "button to activate the relays for additional services" and 2 service buttons. The videophones have also 4 LEDs which indicates the buttons functioning.

controls : loud speaker volume, call tone volume, picture brightness and hue.
Programmable melody, number of rings and privacy duration. Electronic call tone and active low inputs   for local bell and alarm. Add /ECLIPSE to the standard code to order the kit with this video monitor.

Art. 3688 (for CESVK series VIDEOKIT)
Videophone using 3.5" full colour active matrix LCD monitor.
Including 3 buttons ("door-open/intercommunication", "camera-recall" and "privacy/call reject/service") plus 3 LED's*("ON", "Door Open" and "Privacy") for visual indication of all functions.
Programmable options: privacy duration and number of rings.
Controls: call tone volume (3 position: low, standard and high), picture brightness and hue.
Also includes a local bell function.
The Art. 3688 is surface mount and requires the Art. 5980 connection board and wall mounting plate.
This is the standard videophone provided with CESVK series videokit.

Art. SL5456 (for CVK4K, CVR4KV and CVK8K series VIDEOKIT)
Colour hands free video monitor with 3,5" LCD TFT monitor, "door open/intercommunication", "answer/camera recall", "privacy on/ off" and 3 service buttons , plus 4 LEDs indicating the functioning of the push buttons.
Programmable melody, number of rings and privacy duration.
Controls : melody volume, speech volume, picture brightness and hue.
Interface to connect a parallel "4+1" standard intercom. Add "/ECLIPSE" to the standard code to order the kit with this monitor.

Art. 3656 (for CVK4K, CVR4KV and CVK8K series VIDEOKIT)
Videophone using 3.5" full colour active matrix LCD monitor.
Including 3 buttons ("door-open/intercommunication", "camera-recall" and "privacy/call reject/service") plus 3 LED's*("ON", "Door Open" and "Privacy") for visual indication of all functions.
Programmable options: privacy duration and number of rings.
Controls: call tone volume (3 position: low, standard and high), picture brightness and hue.
Also includes a local bell function.
The Art. 3656 is surface mount and requires the Art. 5980 connection board and wall mounting plate.
This is the standard videophone provided with **CVK4K, CVR4KV and CVK8K series** videokit.

To order videokits with old 3000 series videophones (available until end of stock), please put a specific note in your order.

Please, contact our Export Department in order to know the price difference due to the videophone models.
