3.5" 6200 SERIES

4000 SERIES

4000 Series "True" two wire bus videokits available with coded access or proximity access control.

VIDEOKIT

2 WIRE BUS

coded access option

proximity reader option

The 4000 series range "true" two wire bus colour videokits are available as flush or surface kits with optional coded access (ESVKC) or proximity access control (ESVKX). The videokits are available in a selection of different finishes (stainless steel, aluminium or high-brass fascias with either gun metal grey, chrome or gold front support frames) and with a selection of different videophone options including either a 6200 series (3.5" videophone), 6300 series (3.5" hands-free), 6400 series (4.3" hands-free) or 6700 series (7" hands-free) 2 wire bus videophone.
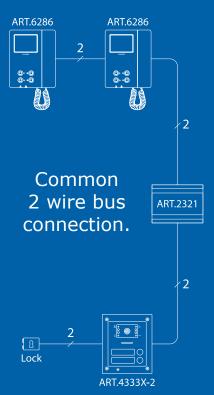

Installations couldn't be easier thanks to the common 2 wire bus using two non-polarity wires. The videokits are ideal for small scale "one to one" installations or low-rise apartment blocks (up to 12 apartments max.), but can also be expanded up to 8 entrances (max.) where additional 2301N multiple entrance switchers are required.

Key features of the kits include: an integrated high quality day/night colour camera with 4 illumination LED's and auto iris lens (wide angle camera optional) and includes an external camera input. DDA compliant call progress LED's (busy, call, speak and door open) with reassurance tones, privacy feature, built-in lock relay with capacitor discharge output option, camera recall function, microphone, speaker and balance adjustments and an intercommunication facility between videophones in different apartments or between videophone extensions within the same apartment.

The proximity access control feature (for the ESVKX kits only) is able to support up to 50 programmable users using either the standard Videx 955/T proximity fobs or the 955/C proximity cards.

VIDEX

Model	System	Description
ESVKX-1/n		1 button 4000 series flush 2 wire bus colour videokit with proximity access (inc. psu, videophone, 1 card and 2 fobs)
