

VANDAL RESISTANT "TRUE" TWO WIRE BUS COLOUR VIDEOKITS

ESVRK SURFACE & FLUSH VIDEOKITS

**VR130
SERIES**

Vandal Resistant "True"
two wire bus videokits
available as flush or
surface 1 & 2 button kits.

VIDEOKIT

**VANDAL
RESISTANT**

**2 WIRE
BUS**

Vindex's Vandal Resistant range of "true" two wire bus colour videokits are available as 1 button or 2 button flush or surface kits (ESVRK series). The videokits are available with a selection of different videophone options including the 6200 series (3.5" videophone), 6300 series (3.5" hands-free), 6400 series (4.3" hands-free) or 6700 series (7" hands-free) 2 wire bus videophone.

Installations couldn't be easier thanks to the common 2 wire bus using two non-polarity wires. The videokits are ideal for small scale "one to one" installations or low-rise apartment blocks (up to 12 apartments max.), but can also be expanded up to 8 entrances (max.) where additional 2301N multiple entrance switchers are required.

Key features of the kits include: an integrated high quality colour camera with 4 illumination LED's and auto iris lens (wide angle camera optional) and includes an external camera input. DDA compliant call progress LED's (busy, call, speak and door open) with reassurance tones, privacy feature, built-in lock relay with capacitor discharge output option, camera recall function, microphone, speaker and balance adjustments and an intercommunication facility between videophones in different apartments or between videophone extensions within the same apartment.
