

The ideal solution for large passageways in apartment blocks and industrial facilities

- Ideal for private or public car parks.
- The model for passages up to 2.5 m (001G2500) comes in the 230 V AC version, while the models for passages up to 3.75 m (001G3750 and 001G3751) and up to 6.5 m (001G6500 and 001G6501) are in the 24 V DC version.
- There is also a version in AISI 304 steel.
- It can be installed either to the left or right. The mounting procedures are easy and quick.
- A truly complete range of accessories to customise your installation, which includes a choice of safety accessories for peace of mind during operation.
- The special joint is for installing CAME barriers even when height is an issue when raising or lowering the boom, as in underground parking lots.
