

K1406

MULTI-USER CALL FORWARDING MODULE KIT, SB2

Kit for forwarding video entry phone calls to smartphones/tablets in a Simplebus 2 system, with a year's connection included. The kit is suitable for installation in apartment blocks and supports up to 50 apartments with 15 enabled users for each apartment. If there are more than 50 apartments, several kits can be used. SimpleApp, available to download free of charge from the Google and Apple stores, can be used to answer calls remotely and to send door opening commands. Call receipt on the app is available if at least one Comelit internal unit is installed inside the apartment. The Kit consists of 1 art. 1406, call forwarding module for Simplebus 2 system; 1 art. 1407, gateway with 4G data SIM a year's usage included, for connection to the internet; 1 art. 1212/B power supply unit for powering all the devices in the kit. All products are designed for DIN rail mounting.
