# RF-*Range*Tester

## Installation and Specification Tool

- A unique and invaluable tool for specifying and installing your wireless installation.

- Kit comes complete with transceiver that replicates the panel. Simply place it where you propose to locate the panel and commence testing your devices

- Simple to use – place the range test wand where you wish to install the sensor and press the appropriate button to emulate the detector you wish to install - you will get immediate audio and visual feedback on the signal strength.

- The wand will allow you to record audio notes for your installer or to aid the drafting of your specification.

RF Signal Strength Indicators

Record/Play Status

Communications Status

Auxiliary Key Status

Used to emulate RF Devices

Used for auxiliary functions i.e. used with RF Device keys to emulate additional devices and commands
