SPB-2P

Pluggable Base for ZP7 Series Notification Devices - POLAR WHITE

General

The SPB-2P is a POLAR WHITE, first fix plug in base for the ZP755 series sounders and sounders with visual indicators.

First fix wiring option

The SPB-2 pluggable bases provide a basis for terminating loop wiring at first fix stage. Forming an integral part of the overall unit assembly, the bases are provided with slots for screw fixing, either directly to the building structure, or a wide range of international conduit boxes. Bases feature large wiring terminals with captive clamping washers to ensure secure termination.

Robust manufacture

Bases are manufactured in moulded ABS and are also available in grey, red and white.

Standard Features

- First fix facility
- Ease of installation
- Large wiring terinals

SPB-2P

Pluggable Base for ZP7 Series Notification Devices - POLAR WHITE

Specifications

Compatibility	ZP755 sounders and sounders with visual indicators
Mounting	Surface
Terminals	Loop +ve in/out
	Loop -ve in/out
	Cable screen continuity
	24 VDC +ve external supply
	24 VDC -ve external supply
Operating voltage	16 - 22 VDC from panel
	24 VDC from external supply
Application	Indoor installation
Temperature range	-10°C to +75°C
Humidity range	20% to 95% RH (non condensing)
Material	Moulded ABS
Dimensions	127mm (Dia) x 5mm (H)
Colour	Polar White
Weight	61g

Ordering Information

Part No.	Description
SPB-2P	Pluggable Base for ZP7 Series Notification Devices - POLAR WHITE
SPB-2G	Pluggable Base for EA55 Series Notification Devices - GREY
SPB-2R	Pluggable Base for ZP7 and EA55 Series Notification Devices - RED
SPB-2W	Pluggable Base for ZP755 and EA55 Series Devices - WHITE
